Yes, you are correct. Sorry. It's not an "area wide" proposal request, but a "community wide" proposal request.

Kristeen – Just to clarify, did Patrick say “Area-Wide” or “Community-Wide” – I believe it was the later so they can perform hazardous assessments. Just so people don’t confuse with our Area-Wide Planning grants which don’t allow for direct environmental assessment work. Joe

Subject: Follow up on WVDEP's Brownfields proposal for Elk River spill

Hi Linda, I just got a call from Patrick Kirby. He wanted us to be aware that the Governor's office was heavily promoting the fact that the DEP submitted a Brownfields proposal for the Elk River spill. They were tweeting about it, etc.

Patrick clarified that WVDEP submitted two assessment proposals:

1. Area-Wide assessment grant (\$200,000) addressing sites and communities in Kanawha Valley area. While not the true intended target area, if funded, DEP could use this grant for work along the Elk River spill area.
2. Site Specific assessment grant (up to \$350,000) proposal addressing numerous properties along the Elk River spill area. The proposal tries to make that case that “site specific” should allow for work on multiple sites that are affected by the spill. It’s a bit of a stretch to call this “site specific”, but this approach has been approved in the past in broad disaster areas – e.g., wide scale tornado damage, hurricane Katrina, etc. The scope of this proposal is to conduct health monitoring, community involvement and some sampling along properties affected by the spill. The proposal does not request funds to address the Freedom Industries property (source of the spill).

There is high political interest in this in WV, so I think Shawn should be aware of it in case he hears about it. Of course, we have no way of guessing whether or not these proposals will be selected for funding. We (Region 3) will not have an opportunity to score or weigh in on whether these proposals are selected for funding. Under the scoring process for this year, it was determined that the home region will not participate in scoring their own proposals.
